International lighting design

Since 1995, LIGHT-POINT has been producing innovative lighting products based on a long tradition for superior quality and craftsmanship.

Over the past 26 years, LIGHT-POINT has brought to market an extensive product collection in an ultra-modern and distinctly Danish design style, a language that continues to unfold today.

The company challenges the perception of what good lighting design can do.

LIGHT-POINT's products express a consistent approach: the quest for the ideal balance of perfect form, the latest in LED technology and something that is both aesthetically timeless and minimal design.

Every design LIGHT-POINT produces, whether it is light for a bathroom, table lamps, pendants for a living room or built-in ceiling and wall lights, has a unique emotive experience.

LIGHT-POINT's extensive product range is suitable for both commercial and residential markets, and the company works closely with architects and designers to find the perfect solution to suit the needs of all of their customers.

Today LIGHT-POINT products are available in over 50 different countries from Scandinavia to China.

Throughout the entire process, LIGHT-POINTs team of dedicated designers headed by the founder Ronni Gol and Head of Design, Nital Patel always do their utmost to achieve the highest possible quality.

Sketches shape the ideas, but it is only until they model the sketches that they bring the ideas to life. It helps ensure that every solution is thought through, down to the tiniest detail — every single time.

Head of Design, Nital Patel developing the ORBIT collection.

It always starts with an idea. Then comes a sketch which gives an immediate sense of the concept and offers a unique opportunity to adapt and adjust the dimensions, shapes swiftly, and, most importantly, the function.

With their huge love of design and a high degree of experience, LIGHT-POINT's design team confidently manage both the development of new collections and the improvements and refinement of existing ones. The philosophy is that there is always room for improvement.

Introducing LIGHT-POINT SMART TUNE

powered by Casambi

Light isn't just light. No one knows that better than LIGHT-POINT. That is why we constantly do our utmost to design even better solutions. LIGHT-POINT isn't just about beautiful design. It's also about smart lighting and, above all, intelligent solutions.

Our latest collections, AURA, EDGE, and ORBIT, have made it even easier to create the perfect atmosphere and lighting – no matter where you are. We have future-proofed our most popular collections by integrating CASAMBI – an intelligent standard for lighting control that provides the unique option of playing with light.

We call it *LIGHT-POINT SMART TUNE powered by Casambi*. All these lamps have in common is that you can operate them with ease and simplicity using your smartphone. It's pretty straightforward. On the screen, tap the luminaire you want to turn on and off, swipe to the side to adjust the brightness, and swipe up or down to adjust the hue of the light from cold to warm – or vice versa – as required.

In 2021 EDGE and ORBIT collection won the prestigious iF Design Award 2021.

LIGHT-POINT is committed to ensuring you with the highest quality standards in luminaire manufacturing. It's just one of the great benefits that gives you greater value for longer.

Here's to at least 7 years peace of mind...

A large, bold, black number '7' is centered on the page. Overlaid on the '7' is the text 'YEARS' in a light gray, sans-serif font, positioned above the text 'WARRANTY', which is also in a light gray, sans-serif font. The '7' is a thick, blocky font.

New Colour /
Titanium /

Deep
Reflective Tone /
Brushed Surface /

Titanium is our latest colour invention: A soft grey with an industrial sharpness. The effect derives from the delicately brushed surface of the aluminium. The Titanium has a deep reflective tone, appearing dark and light depending where you stand to look at the product.

Products

AURA

23

AURA S1 / Rose Gold
Design: Nital Patel

The AURA pendants are the newest line extension to the series.

Its design is based on the principles of the international architectural style, combining clean lines with technical precision.

The pendants use a deep light source enclosure and is combined with an optic glass. Both the wall and pendants boast with having the warm LED light source completely out of peripheral vision, making it a comforting glare-free ambient mood light.

With clean-cut lines, made of aluminium COMPACT is beautiful as well as functional.

Meeting the IP54 standard, the lamp is approved for outdoor use, but can, of course, also be used indoors.

Titanium is the latest colour update to the COMPACT collection. The gently brushed and reflective surfaces continues to refine the aesthetic of the timeless design.

Award-winning pendants

EDGE ROUND / Titanium
EDGE LINEAR / Titanium
Design: Nital Patel

We are very honored to receive this recognition for our work. It is something we always hope happens when designing products – and then with a product we are incredibly proud of.

— Head of Design, Nital Patel

EDGE collection
iF Award Winner 2021
Design: Nital Patel

EDGE results from our desire to design a premium collection of pendants that embodies the architectural international design style. The goal was a lamp that could distribute perfect light while looking both beautiful and sculptural.

The collection has several features, elegantly underscored by its conical shape. So, the widest side is designed to provide excellent, functional light, whereas the narrower side provides more ambient lighting.

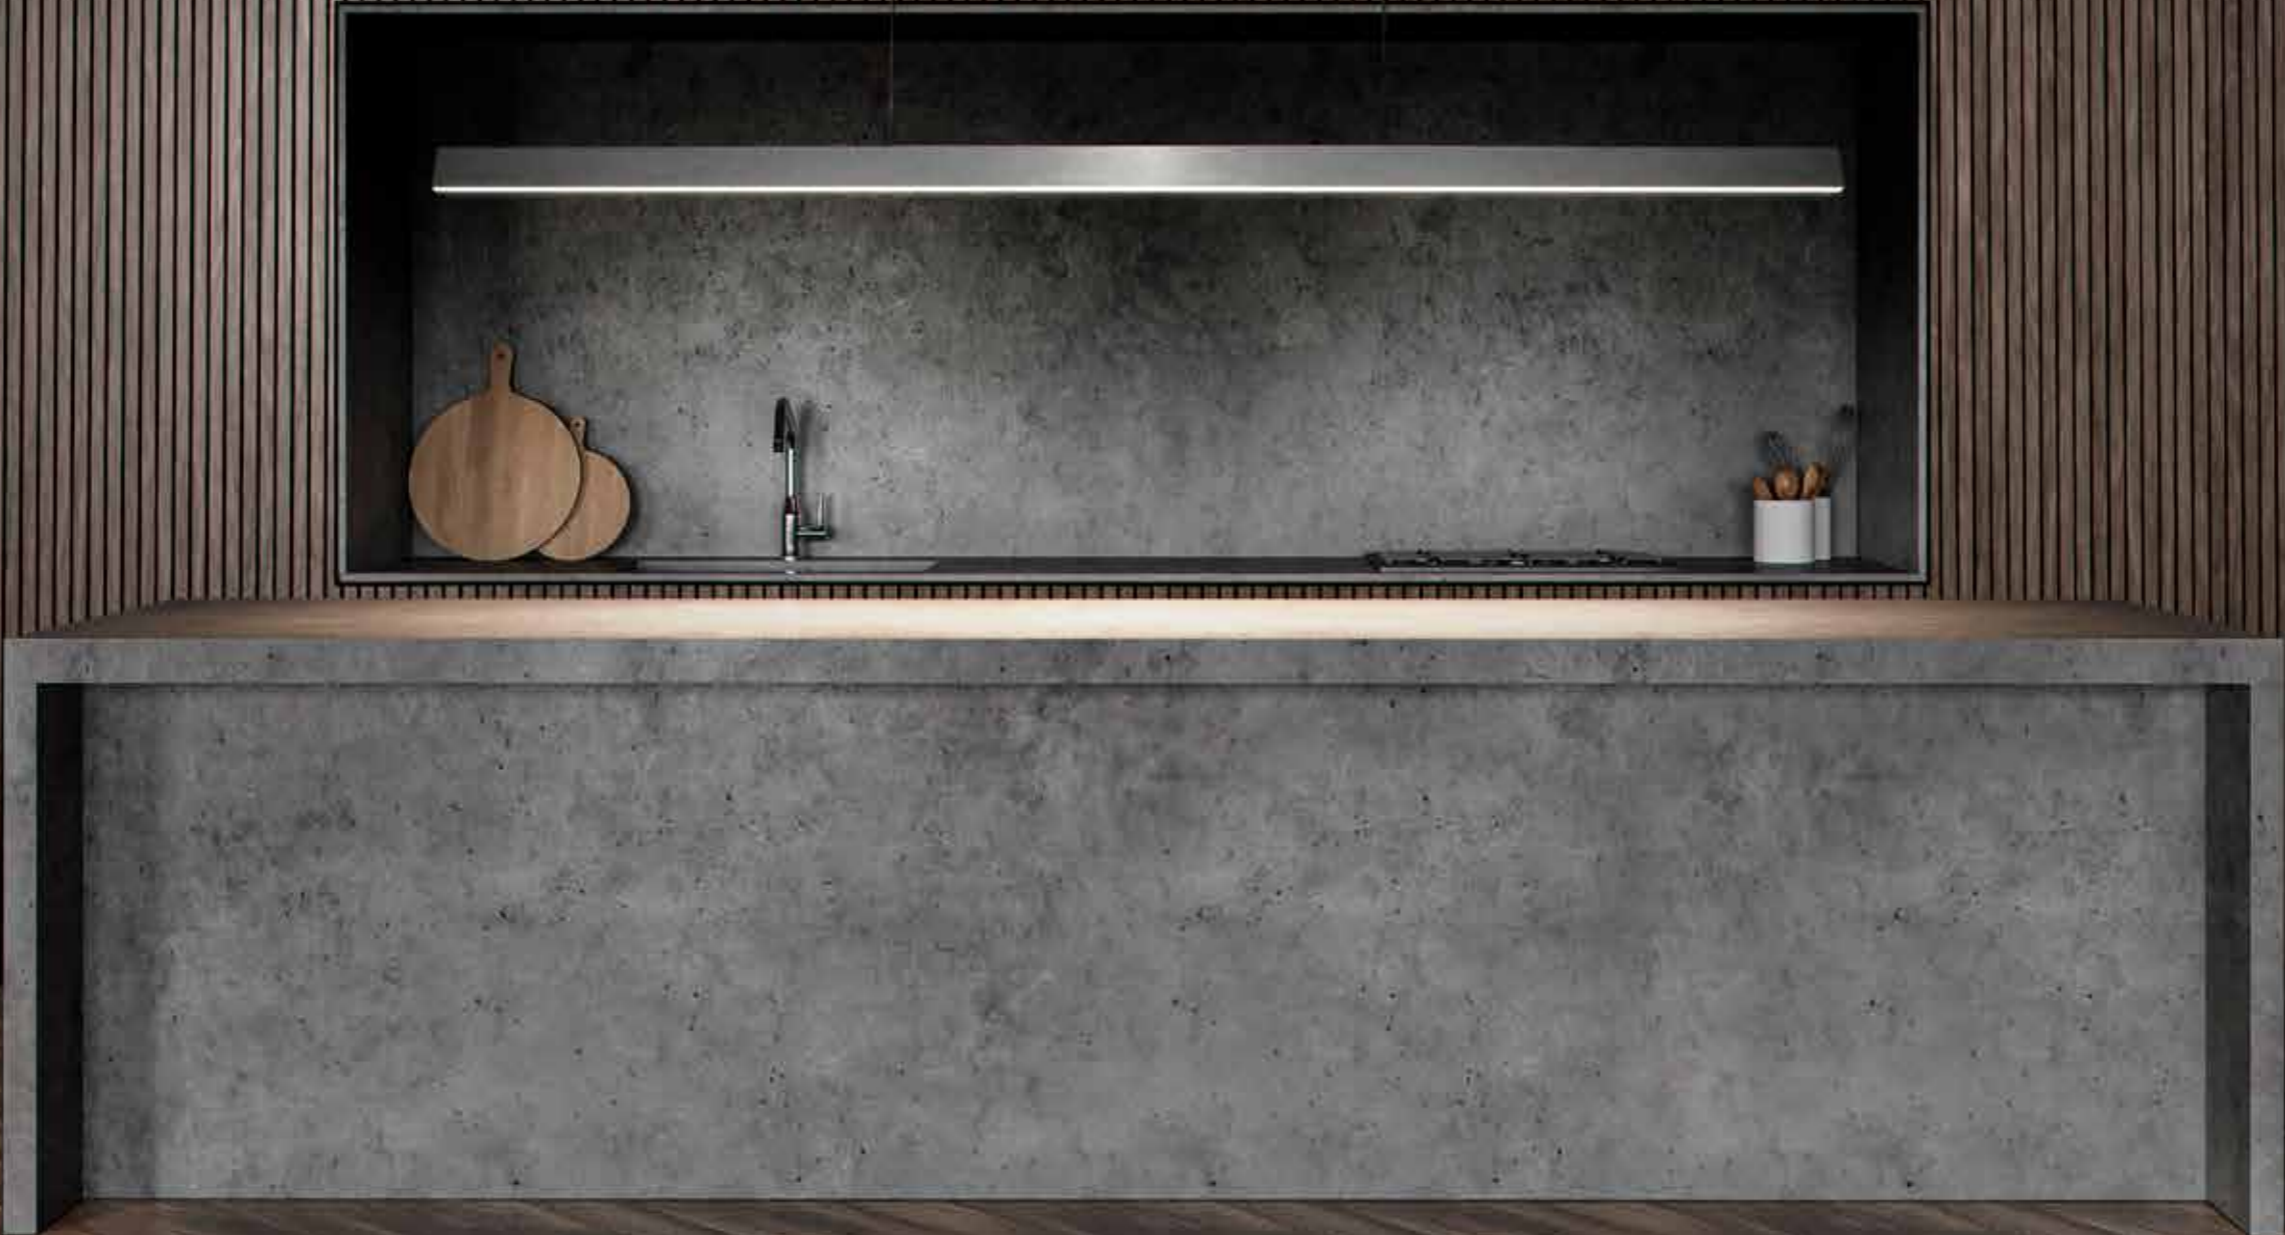

EDGE's iconic shape lends a lovely aesthetic touch to any ceiling or wall, making an interior more cutting edge.

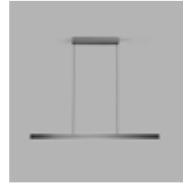

The collection features both circular and linear lamps all made of top-quality aluminium, and available in Rose Gold and our latest Titanium.

In 2021, the EDGE collection won the prestigious *iF Design Award 2021*.

EDGE LINEAR

Design: Nital Patel

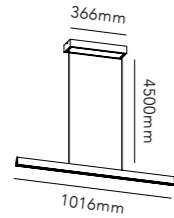

Pendant height up to 4.5 m.
*Anodized surfaces may vary ±10%.

- Dimmable with
- Integrated LIGHT-POINT SMART TUNE Powered by Casambi
 - Integrated touchless sensor
 - External Casambi compatible switches

FACET / Black
Design: Design Studio Lars Vejen

reddot award 2019
winner

The FACET Collection convinces with its asymmetric lines of sculptural appeal. Furthermore, the light distribution helps to create characteristic room atmospheres.

— Reddot Award Jury

FACET collection
Reddot Winner 2019
Design: Design Studio Lars Vejen

The ultra-modern Facet wall lamp combines functionality with an intriguing asymmetric appearance.

The idea behind the Facet wall lamp, which was designed by Danish architect Lars Vejen, was to create a simple, functional and durable design, that would become a future classic in terms of lighting.

The design is based on an asymmetric extruded aluminium profile. Two different angles are cut in to shape the profile, one at the top and one at the bottom, so the dimmable LED light source spreads through the design upwards and downwards. It is suitable for both indoor

and outdoor use and is available in two sizes. The design is available in either black or white versions.

The production of the Facet lamp merges industrial processes with a handcrafted finish, to achieve a streamlined product, yet one with the required attention to detail. In this way, form and function seamlessly work together to balance the overall design of the product.

In 2019, the collection received the prestigious international Red Dot award for high-quality design.

The LANTERN collection works as decorative individual pieces or grouped together as an installation.

They are also effective as secondary lighting in larger spaces such as illuminating a passageway.

Featuring geometric lines, this timeless outdoor lamp series projects an emotionally appealing overall image.

— Reddot Award Jury

LANTERN collection
Reddot Winner 2019
Design: Marie Holsting

The award-winning LANTERN collection is a contemporary take on the classic lamp shape that dates back centuries.

The LANTERN collection designed by Danish designer Marie Holsting, has a rectangular shape and a solid black structured finish, made from aluminium and glass. It comes in wall, floor and portable table versions and has a built-in LED light source. This radiates an interplay of angles and geometric shapes that gives the collection its distinctive graphical and architectural appeal.

The wall version comes in two sizes and is also weatherproof, so it is suitable for both indoor and outdoor use. Indoors, it can create a cosy and intimate lighting effect, both as a single light source or in combination with ceiling

lamps. Several LANTERN wall lamps can be lined up together on a wall to create a more decorative element.

The LANTERN floor light, meanwhile, is an elegant option for outdoors. It creates a light-filled and calming space in the dark.

The floor lights work well as decorative individual pieces or grouped together as an installation. They are also effective as secondary lighting in larger spaces, such as illuminating a passageway.

In 2019, the collection received the prestigious international Red Dot award for high-quality design, and later that year received a Danish Design Award nomination in the category "Lamp of the year".

Add an aesthetic dimension to your wall. The NOHO collection is an iconic example of LIGHT-POINT's minimalist style that can enhance environments.

NOHO is a wall-mounted LED lighting system, based on recessed square tiles that can be placed creatively on the wall in every imaginable pattern.

The collection is a perfect mood setter, allowing you to freely create visual presence in the design of a room.

The OPTIC collection embodies credo *Form Follows Function*. Enjoy the sleek shape and superb performance of these elegant spot lights and pendants.

The optic glass provides a glare-free light and provides maximum light where needed.

Each faceted spot on OPTIC LINEAR is seamlessly sculpted into the linear profile adding an aesthetic dimension. The surprise is the consistent spread of light on the surface as opposed to circles of light that would generally be expected from spot fixtures.

Award-winning collection

ORBIT W2 / Rose Gold / Titanium
ORBIT PENDANT 1 / Rose Gold
Design: Ronni Gol & Nital Patel

The idea of ORBIT was to create an innovative, high-end collection based on the concept of *Form Follows Function* and to come up with a new take on the familiar LED lamp, right down to the smallest detail.

— Nital Patel, Head of Design

ORBIT collection
iF Award Winner 2021
Design: Ronni Gol & Nital Patel

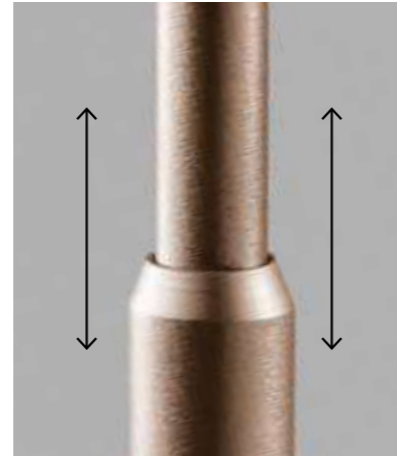

The basis of the design is a shape that guarantees optimum function. There are no traditional plastic LED reflectors. Instead, the design features optical glass, which ensures optimum lighting without dazzling or irritating our eyes. The glass also helps distribute the light elegantly – further, more widely, and, in particular, more gently.

The lamp was designed in such a way that at the end of its life, it can be fully recycled, thanks to its all-aluminum and glass body.

The ORBIT collection features floor lamps, wall lamps, pendants and garden stands.

ORBIT PENDANT can be operated using a smartphone with *LIGHT-POINT SMART TUNE Powered by Casambi* or by a touchless sensor to turn the light on/off, adjust the light intensity and change the colour temperature.

In 2021, the ORBIT collection won the prestigious *iF Design Award 2021*.

The ORBIT FLOOR lamp is height adjustable and can be operated by the touchless sensor to turn the light on/off and adjust the light intensity. Both spots can be controlled independently from one another, thus allowing users to shape their light.

RIGHT PAGE SOHO / Rose Gold
Design: Ronni Gol

Create dynamic movements or calm uniformity by combining different sizes and colours of the SOHO collection.

There are no creative limits with the award-winning SOHO lamp. SOHO is a wall-mounted LED lighting system, based on recessed round tiles that can be placed creatively on the wall in every imaginable pattern.

The collection is a perfect mood setter, allowing you to freely create visual presence in the design of a room.

With aesthetically backlit surfaces, the SOHO lighting system achieves a fascinating overall appearance and offers a high degree of flexibility.

— Reddot Award Jury

SOHO collection
Reddot Winner 2020
Design: Ronni Gol

SOHO is a wall-mounted LED lighting system, based on recessed round tiles that can be placed creatively on the wall in every imaginable pattern. The collection is a perfect mood setter, allowing you to freely create visual presence in the design of a room.

Originally designed in 2015, the newest collection in brushed anodised rose gold finish are the newest relaunch of decorative lamp collection.

SOHO is ideal for multipurpose rooms in residential homes as well as in shops, studios, showrooms, offices and hotel lobbies.

SOHO consists of 5 different sizes, each recessed slightly further away from the wall, allowing for overlapping patterns. Based on individual design, SOHO enables for unlimited number of tiles in one set-up.

The collection is available in a range of colours to choose from. The pallet includes black, white and gold in a structured powder coated finish, and a newly released rose gold and titanium in brushed finish. Each lamp is made from CNC machined high quality aluminium, which has been the best choice of material for absorbing heat created by the LED's.

SURFACE can be used as a traditional ceiling pendant with the aid of a suspension kit.

This allows the lamp to be suspended up to two metres down from the ceiling, and consequently makes rooms with high ceilings seem more welcoming.

It can even be fitted vertically to a wall as an elegant, glowing circle. This is ideal in large walk-through areas, for example. This way, the light source becomes part of the décor.

TULIP / Rose Gold
Design: Ronni Gol

The ascending curves gives the TULIP pendant lamp a distinctive three-dimensional expression. The pendant is telescopic which can not only be extended but can also be rotated in any direction, giving light where you want the most.

The VANTAGE spotlights impress with their high lighting comfort and blend in discreetly with different interiors.

— Reddot Award Jury

VANTAGE collection
Reddot Winner 2020
Design: Nital Patel

VANTAGE is a state-of-the-art LED spot lamp that works optically, spreading light further, wider and softer. Replacing traditional reflectors with an optic glass provides glare free light, eliminating annoyance to the eyes.

The collection is made up of four sizes and four colours; in a structured powder coated black and white and in a brushed rose gold and titanium.

Each lamp is made from CNC machined high quality aluminium which has been the best choice of material for absorbing heat created by the LED.

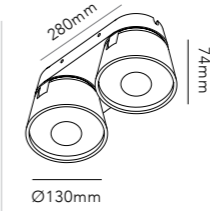

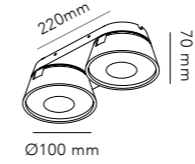

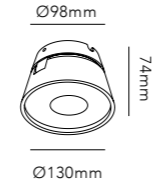

The conical shape adds an aesthetic dimension to any ceiling or wall. The spot can be pivoted at 90 degrees to the mounting point and rotated almost 360 degrees, providing maximum light versatility to a typical fixed spot lamp.

A downlight design realised without aesthetic distraction, the new CURVE series perfectly embodies the brands design language, combining clean lines with technical precision.

The deep LED light source is combined with an optic glass that is completely out of peripheral vision, making it a comforting glare-free spot light.

RAW is an attitude of refined simplicity and technical precision that has become synonymous of LIGHT-POINT's design style. The Raw spot lamps feature the brand's newest signature, cross-knurled pattern that is machined into solid aluminium, giving it a contemporary, yet elegant aesthetic at the same time. The diamond facets in the knurling textured have been softened to enrich the depth of the anodised colours.

(This excludes batteries)

General terms of sale and delivery

The following terms and conditions cover all deliveries and services from LIGHT-POINT A/S, unless other terms have been agreed upon in writing.

Tender

A tender is binding for three weeks from the date of the tender.

Dispatch/return of goods

Delivery will be EXW LIGHT-POINT A/S' warehouse (Incoterms 2000) unless other terms have been explicitly agreed upon. When buying any of LIGHT-POINT A/S' goods for resale buyer shall defray all freight charges himself.

Dispatch will take place at buyers' own account and risk. When delivery has been agreed to be free of carriage the cost of dispatch is included in the price and the dispatch will be at the risk of LIGHT-POINT A/S. Buyer is only entitled to annul the order due to delay provided delivery is delayed for more than 30 days. Returned goods will only be received when prior agreement of return has been reached and then only in the original wrapping and in an undamaged state. A copy of the delivery note or the invoice must accompany the returned goods.

Erroneous orders for standard goods will be deducted 20% for handling and control. Special goods, procured goods and unwrapped light sources will not be accepted for return.

Prices

All prices are current prices stated in DKK exclusive VAT, government taxes and light sources unless otherwise stated. All prices are stated without prejudice to printing errors, price changes and discontinued goods.

Payment

Unless otherwise stated in LIGHT-POINT A/S' tender or other written agreement our terms of payment are net cash at delivery/collection. At delay in payment a fee of DKK 100.00 and interest of 2% per commencing month will be added.

Notification of defects

Buyer is obligated to examine the goods immediately after receiving them. Notification of defects must be given to LIGHT-

POINT A/S within 8 days of delivery. If buyer does not notify LIGHT-POINT A/S of defects within this time-limit he will not be able to cite any defects at a later date. Expenses incurred by buyer in connection with cited defects are not covered by LIGHT-POINT A/S unless LIGHT-POINT A/S has received the notification of defects and has given a written acceptance to cover the costs.

Warranty

Products which have a manufacturing fault or a flaw in the material will be repaired without cost or exchanged in accordance with the rules in the Danish Sale of Goods Act and to the same extent that the warranty from sub-suppliers covers. Light sources are not covered by warranty.

Exemption of liability

Non-fulfilment including delay or delivery of defective goods will only justify buyer compensation provided buyer documents that the non-fulfilment is caused by gross negligence on the part of LIGHT-POINT A/S. However LIGHT-POINT A/S is in no case responsible for operating loss, loss of time, loss of profits or other like indirect losses including daily fines inflicted on buyer.

Product liability

The company is only responsible for product liability in accordance to the rules in the Danish Product Liability Act. Beyond this the company is not responsible for product liability.

Disputes

Disagreements in connection with the cooperation of the parties with reference to this agreement must be solved according to Danish law, in as much as the parties agree that the venue shall be the Maritime and Commercial High Court in Copenhagen or alternatively the City Court of Copenhagen.

Copenhagen K, 1st of September 2021.
