

THINK PAPER STUDIO

Think Paper designed The Dutch Tulip on behalf of the Rijksdienst voor Ondernemend Nederland. This pavilion was presented at the WorldSkills event in Leipzig and was entirely made of cardboard. No less than 200,000 visitors visited The Dutch Tulip. The spectacular concept is now being translated into exclusive products, inspired by passion for design and unusual sustainable materials.

To this day Think Paper has created a unique portfolio with exclusive products and custom-made objects for both the business and private market, nationally and internationally.

KRAFTS COLLECTION

The word KRAFTS stands for Kraft (with a K), the solid type of paper used as a top layer. And Craft (with a C), which means professionally handmade. The KRAFTS are designed to complement any interior with their warm, atmospheric, full and elegant appearance. Each of the KRAFTS is assembled in the Netherlands in an environmentally friendly, socially responsible and expert manner. The combination of the most modern techniques and the most refined craftsmanship makes it possible to create a special pattern that gives a unique effect to every space, environment and occasion.

Each design has its own identity. Whatever style you have, you will always find a KRAFT that suits you.
