

TEKNA

Tekna in a nutshell

Thanks to Tekna's timeless designs made from robust, high-quality materials, Tekna has been a pioneer in the lighting world since the early 1990s. The seamless finish of our lighting exudes pure quality. This approach is particularly appreciated both at home and abroad. With the Nautic, Arton, Astone and Flatspot collections, our brand occupies a particularly large segment of the market because we manufacture both architectural, atmospheric and designer lighting.

*"In the right light, at the right time,
everything is extraordinary."*

Aaron Rose

*“If you light a lamp for someone
else it will also brighten your path”*

Handcrafted in Europe

Tekna has a great passion for traditional techniques with a personal touch. Therefore we are always looking for authentic ideas that can be produced by hand, in Belgium. No luminaire is the same, that is the power of "handmade".

Our recipe for success? Pure materials, craftsmanship and solid, functional designs.

***To create something exceptional,
your mindset must be relentlessly focused on the smallest detail.***

Every design is created with natural materials. Almost 98% of our fixtures are made out of brass. Not only is it a high quality material, it's also a very rewarding and reliable material to work with. You can easily bend it into the desired shape and it can easily withstand all weather conditions. You can also find bronze, aluminum, red copper, marble and glass in our lighting, these noble materials are extremely rewarding and lend themselves perfectly to Tekna's wide range of collections. These robust materials make our brand what it is.

To develop our luminaires, we resolutely opt for one approach: we combine strong, traditional methods with a timeless character. A successful recipe that radiates simplicity, functionality and elegance.

LÚMMI LED BULB

We're pleased to introduce "Lúmmi", our new LED bulb used in all our exclusive lighting designs. Over the past year we have worked intensively to bring the perfect lamp for decorative lighting to the market.

The lamp has a warm and cozy glow with 2200K and 400lm. Moreover, we found it extremely important to take the ecological aspect into account. We are proud to announce that our new "Lúmmi" bulb is 100% plastic free and the socket is made entirely out of glass, something that has never been done before.

***The fitting is made entirely out of glass.
This distinguishes us as the first on the market.***

Please note that all devices manufactured after 2022 will be produced with our new Lúmmi bulb. The pictures in this catalog date from before this launch and still have the previous lamp.

Tekna was founded in the early 1990s, continued to innovate and became a real pioneer in the world of lighting.

In 2017 the Blijweert family became the head of Tekna. With a shared passion for the artisan, high quality lighting and an endless experience in the entrepreneurial world, completely ready to take Tekna to the next level.

A word from our CEO

We are convinced that Tekna can broaden its offer and achieve even more by maximizing its strengths. And this last point is extremely important to us, the high level of finishing, craftsmanship and noble materials must always remain the thread that links our products.

Behind every strong brand is a strong team. This team contributes enormously to Tekna's evolution. This evolution is not only characterized by innovative designs, materials and production techniques. There is a strong focus on the quality level of our products and services towards our customers. Everyone is committed to ensuring ever-increasing quality every day.

With a Tekna community spread all over the world, we want to give the world of lighting a new dimension.

- Maxim Blijweert, CEO

NAUTIC®

Nautic is our iconic collection of authentic luminaires, made from raw materials. Tekna found its inspiration in the world of the marine. The maritime aspect, the charming character of old train sets and the craftsmanship in factories form the basic idea for Nautic's designs. An original combination where simplicity and functionality are key. The timeless design and choice of materials give the luminaires a harmonious appearance. They are atmospheric and stylish, without unnecessary adornment.

Throughout the years, Nautic has become a true concept in the lighting world. Thanks to the use of robust materials, the luminaires are suitable for all weather conditions and therefore resistant to sea salt, which is required for example for those who need lighting that is suitable for coastal areas. Nevertheless, thanks to the seamless finish, the collection has a very sophisticated look that exudes pure class. And despite the fact that Nautic's style was initially inspired by maritime art, we have also opted for other styles in recent years, which means we market a wider collection.

ARTON®

Arton allows us to focus on an audience that loves striking, unique and high-end design lighting. Sometimes a little eccentric, sometimes basic with a little flair. One thing is for sure, this lighting will grab your attention.

With these designs we surpass a lot of contemporary designs. Tekna makes the difference by combining a remarkable design with exceptionally high quality materials and our typical seamless finish.

The inspiration of this collection finds its origin in the Art Deco line with a today's touch. Rich colors, geometric figures and exuberant decorations are reduced to fine accents that make each design unique. We love to experience shapes, colors, glass structures and materials including bronze and brass. These combinations often lead to innovative designs.

We count on our in-house designer who knows better than anyone how to work exclusively and creatively without losing sight of Tekna's core values.

GIOBAGNARA X TEKNA

We proudly present to you our exclusive and exciting collaboration with GioBagnara, pioneer in Italian luxury leather. Tekna strives to constantly improve itself: creating new designs and exploring cutting-edge materials. Because our lighting is all about seamless finishes, authentic design and decorative excellence, we are committed to seeking partners who reinforce these high-level values.

The TEKNA x GIOBAGNARA Collection aims to create pieces able to generate unique atmospheres and enhance spaces, giving birth to a union where traditional Italian and Belgian lifestyles meet.

GioBagnara, a brand that is distinctive for elegantly designed creations that express luxury without ostentation, available in an uncommon and virtually limitless color palette of leathers and suede, handcrafted to the highest standards using both traditional know-how and leading-edge technology.

"Elegant, unique but above all exclusive. The collection rests on these pillars and is one-of-a-kind in its sector. With this collection we want to delight Tekna lovers with quality and detail. Transform any space into a dynamic landscape of light and texture. Mix & match different color tones and stitching, everything to create your personalized masterpiece, carefully treated and assembled by hand."

TEKNA

Thanks to Tekna's timeless designs made from robust, high-quality materials, Tekna has been a pioneer in the lighting world since the early 1990s. The seamless finish of our lighting exudes pure quality. This approach is particularly appreciated both at home and abroad. With the Nautic, Arton and Flatspot collections, our brand occupies a particularly large segment of the market because we manufacture both architectural, decorative and designer lighting.

Tekna has a great passion for traditional techniques with a personal touch. Therefore, we are always looking for authentic ideas that can be handmade in Belgium. No luminaire is the same, that is the power of "handmade".

Every design is created with natural materials. Almost 98% of our fixtures are made out of brass. Not only is it a high quality material, it's also a very rewarding and reliable material to work with. You can easily bend it into the desired shape and it can easily withstand all weather conditions. You can also find bronze, aluminum, red copper, marble and glass in our lighting, these noble materials are extremely rewarding and lend themselves perfectly to Tekna's wide range of collections. These robust materials make our brand what it is.

To develop our luminaires, we resolutely opt for one approach: we combine strong, traditional methods with a timeless character. A successful recipe that radiates simplicity, functionality and elegance.

" With a Tekna community spread all over the world, we want to give the world of lighting a new dimension. "

GIOBAGNARA

Renowned for its elegant creations that convey luxury without ostentation, GIOBAGNARA adheres to the highest standards of craftsmanship. By pursuing a philosophy that incorporates traditional knowhow with leading-edge technologies, and offering a limitless color palette of quality leathers and suede, founder Giorgio Bagnara has been able to experiment and push the technical boundaries of his craft in order to create pieces that are both beautiful and functional.

Launched in 1999, the GIOBAGNARA brand has quickly earned a reputation for expert leather workmanship, and its founder has become a key partner for a large number of interior designers as well as a select group of yacht and private jet designers who rely on his specialized knowledge to realize made-to-measure commissions.

In 2015, Giorgio Bagnara expanded his leather goods portfolio with the acquisition of saddle leather specialist RABITTI1969. In 2017, Bagnara initiated a collaboration with French designer Stéphane Parmentier, who was appointed creative director of GIOBAGNARA and its affiliate brands.

In 2018, the company's portfolio grew with the strategic acquisition of PIGMENT FRANCE, a respected company with specialized skills in leather covering and the weaving of wicker, rattan and straw. Today, two decades after its launch, GIOBAGNARA counts more than 60 employees. The brand now boasts an impressive offer of quality leather homewares and is ready to embark on its next exciting chapter.

FLATSPOT®

Flatspot was created in 2009 as a result of the increasing demand for functional indoor lighting. Tekna recognised the challenge this posed and developed Flatspot, a lighting collection that consists of a wide range of spotlights with unique features. Ordinary spotlights only illuminate one specific zone. Flatspot has been developed in such a way that the light surface is much wider and can be specifically targeted, without causing shadows on the walls. As a result, we have developed an extensive collection of semi built-in and fully built-in downlights, and directionals.

The Flatspot collection contains luminaires for both private homes and commercial projects. Our largest customer base is the project market. For example, our products highlight objects in museums, shop windows, hotel lobbies and art galleries so attention is drawn to the desired location.

You can snap any built in spot from this collection in the same mounting sleeve. Simple, quick, sustainable and great-looking. What more could you ask for?
